SUBJECT INDEX FOR VOLUME 10

A

Abcesses—
In feed-lot cattle, 733
Abomasum—
Its contents in male Holstein calves, 969
Abstracts—
Papers presented at forty-third annual meeting of the American Society of Animal Production, 1022
Alfalfa ash—
Effect upon roughage digestion in sheep, 434
Alfalfa hay—
Effect of DDT dusting on fattening lambs, 581
Animal breeding—
Correction factors for adjusting weaning weights of range calves to a constant age, 371
Crossbreeding of sheep, 462
Genetic and environmental correlations between weaning scores and subsequent gains of steers in the feed lot, 365
Genetic and environmental factors affecting type and condition in Navajo and Navajo crossbred weanling lambs, 455
Heterosis in crosses of inbred lines of Duroc swine, 505
Impact of genetics, 311
Variation in puberty phenomena in inbred boars, 494
Variation in puberty phenomena in inbred gilts, 479
Animal Husbandry—
Its development and objectives, 781
Antibiotics—
Effect on swine in drylot rations, 828
Growth promoting effects on pigs, 538
Supplement in small grain rations for swine, 629
A.P.F.
In small grain rations for swine, 629
Supplements in milk replacements for dairy calves, 144
Value in rations for growing and fattening pigs, 545
A.P.F. concentrate—
Effect on gestating, lactating, and growing swine, 657
Results on growing-fattening pigs, 42
Artificial insemination—
Volume of semen and number of sperm needed for fertility in swine, 138
Artificial rumen technique—
Use in finding mineral influences on urea utilization and cellulose digestion by rumen microorganisms, 693
Atropine blockage—
Of bovine ovulation and its significance, 719
Aureomycin—
Contained in rations for weanling pigs, 813
Effect upon spermatozoan livability and control of bacteria in bovine semen, 322
Effect on swine gestation, lactation, and growth in APF concentrate, 657
Effect on swine growth and on resistance to artificial infection with *Salmonella choleraesius*, 617
Supplementary value in plant protein ration for growing-fattening pigs, 820

B

Bananas—
Value in rations for growing and fattening pigs, 545
Basal energy—
Of dairy calves in hyperthyroidism, 149
Body temperature—
Affected by sprinkling dairy cattle, 961
Effect of summer environment in swine, 523
Body weight—
Effect on the biological value of protein for growing swine, 50

C

Calcium pantothenate—
Supplementary value in a practical mixed plant and animal protein ration containing B_{12} and aureomycin for weanling pigs in dry lot, 813
Carcass studies—
Hogs of different breeding, 638
Carotene—
Value compared to vitamin A for supplying vitamin A requirement of swine, 551
Cattle—
Classification scores of Hereford cows, 378
—Correlations between weaning scores and subsequent gains in the feed lot, 365
Correction factors for adjusting weaning weights of range calves to a constant age, 371
Correlations of gains made at different periods, 760
Differences in digestibility of feeds by cattle and sheep, 337
Effect of antibiotics upon spermatozoan livability and control of bacteria in semen, 322
Effect of time interval between last feeding and slaughter upon levels of certain B vitamins in digestive tract of 16-week-old calves, 714
Effect of vitamin B_{12} (A.P.F.) on growth of calves weaned early, 331
Influence of type on feedlot performance and killing qualities of Hereford steers, 195
Interval between ovulation and attachment of embryo, 993
Ovarian response in heifers to progesterone injections, 752
A permanent rumen fistula cannula, 417
Relations between some body measurements and certain performance characters in steers, 352
Relationship of interval between inseminations to bovine fertility, 988
Shades, 184
Significance of atropine blockage of bovine ovulation, 719
Steers compared to lambs as to digestibility of different prairie hays, 236
Cattle, beef—
Distribution of P_{32} in the tissues of a steer fed grass from land that received labeled fertilizer, 335
Effect of consumption of cooled drinking water in a hot climate, 742
Feed efficiency related to digestion rates, 726
Methods of feeding cane molasses and urea, 939
Moisture, ash, and fat content of connective tissue at different ages, 394
Phenotypic expression of homozygous dwarfism, 922
Relationships of five body measurements to slaughter grade, carcass grade, and dressing percentage, 386
Size of calves at weaning as a permanent characteristic of range Hereford cows, 768
Thyrotropic hormone deficiency in homozygous dwarf beef cattle, 916
Value of ammoniated condensed distillers molasses solubles in beef cattle feed, 934
Cattle, dairy—
A.P.F. supplements in milk replacements for calves, 144
Basal energy and nitrogen metabolism in hyperthyroidism of calves, 149
Effect of sprinkling on respiration rate, body temperature, grazing performance, and milk production, 961
Net energy vs. TDN in evaluating efficacy of an all-alfalfa hay ration for milk production, 947
Physical characteristics of tissue and content of rumen, abomasum, and intestines in male Holstein calves, 969

Protein allowance and requirement for growing heifers, 171
Value of wood molasses as a feed, 163
Cellulose—
Digestion by rumen liquor in the presence of an antiseptic, 203
Chromogen method—
Determining digestibility and forage consumption of plants by sheep, 565
Coal—
Effect on the growth rate of pigs, 543
Cobalt—
Deficiency in sheep affected by vitamin B_{12} or vitamin B_{12b}, 1017
Level of tolerance in yearling sheep, 266
Metabolism studies with sheep, 428
Colostrum—
Sow's, seasonal variation in fat, vitamin A, and vitamin D, 533
Connective tissue—
Moisture, ash, and fat content from cattle of different ages, 394
Corn—
High- and low-fat content for fattening swine, 902
Corn-alfalfa hay ratio—
Effect on the digestibility of the different nutrients by sheep, 424
Corn by-products—
Protein efficiency, 607
Corozo palm nut meal—
Value in rations for growing and fattening pigs, 545
Corpora lutea—
Effect of removal and replacement with progesterone on pregnancy in goats, 411
Correction factors—
For adjusting weaning weights of range calves to a constant age, 371
Cottonseed meal—
Effect of vitamin A metabolism in sheep compared to other sources of protein, 251
Special solvent, with or without vitamin B_{12} or streptomycin, as protein source for swine, 624
Cow manure—
Value in rations for growing and fattening pigs, 545
Cystine—
Effect on the growth of weanling pigs, 57

D

DDT—
Effect of feeding dusted hay to fattening lambs, 581
Desert plants—
Methods of determining digestibility in sheep, 565
Differential staining—
The technique for characterizing mammalian spermatozoa as dead or living, 226
Digestible energy—
In the evaluation of feeds, 344
Digestibility—
Chromogen method, 565
Comparisons between steers and lambs fed prairie hays of different quality, 236
Determined by dye as a reference material, 574
Of feeds determined from proximate composition, 706
Of the different nutrients by sheep affected by the corn-alfalfa hay ratio, 424
Lignin ratio technique, 565
Rate related to feed efficiency in beef cattle, 726
Significance of differences between cattle and sheep, 337
Digestion—
Of cellulose by rumen microorganisms influenced by minerals, 693
Comparison of relative accuracy between seven-day and ten-day collection periods in digestion trials, 244
In vitro digestion of cellulose by rumen liquor in the presence of an antiseptic, 203
Of roughage as affected by alfalfa ash in sheep, 434
DL-tryptophan
Quantitative requirement of the weanling pig, 73
Dried whey—
Results on growing-fattening pigs, 42
Dye—
Determining digestibility of lamb rations, 574

E

Energy—
Sources and amounts influencing urea utilization by rumen organisms, 683
Environment—
Effect on staple length of crossbred weanling lambs, 278
Sources of variation in gestation length of the horse, 789
Enzymes—
Supplement in milk replacements, 975

F

Fat—
Seasonal variation in content of sow's colostrum and milk, 533
Specific gravity as a measure of content in the pork carcass, 97
Utilization in baby pigs affected by particle size and phospholipid, 867
Fattening—
Effect of feeding vitamin B_{12}, A.P.F. concentrate, and dried whey, 42
Feed—
Efficiency related to digestion rates in beef cattle, 726
Evaluation by the use of digestible energy, 344
Proximate composition used in estimating digestibility, 706
Value of ammoniated condensed distillers molasses solubles for beef cattle, 934
Value of low- and high-fat corn for fattening swine, 902
Wood molasses for dairy cattle, 163
Feeding—
Cane molasses and urea methods to beef cattle, 939
Factors affecting age at puberty in gilts, 841
Forage consumption—
Chromogen method, 565
Lignin ratio technique, 565
Fertility—
In artificial insemination of swine, 138

G

Genetics—
Impact on animal breeding, 311
Phenotypic expression of homozygous dwarfism in beef cattle, 922
Sources of variation in gestation length of the horse, 797
Gestation—
Effects of APF concentrate containing aureomycin in swine, 657
Environmental sources of variation in the horse, 789
Genetic sources of variation in the horse, 797
Goats—
Effect of corpora lutea removal and replacement with progesterone on pregnancy, 411
Grazing performance—
Affected by sprinkling dairy cattle, 961
Growth—
Effects of A.P.F. concentrate containing aureomycin in swine, 657
Effect of feeding vitamin B_{12}, APF concentrate, and dried whey, 42
Effect of methionine and cystine in weanling pigs, 57
Effect of soft and hard coal on pigs, 543
Effect of thyroprotein on growth of anterior pituitary of swine, 129
Effects of various antibiotics on pigs, 538
Effects of vitamin and mineral supplements in drylot for swine, 875
Influence of type in Hereford steers, 195
Of baby pigs affected by particle size and phospholipid, 867
Protein allowance and requirement for dairy heifers, 171

H

Hereford cows—
Size of calves at weaning as a permanent characteristic, 768
Heterosis—
In swine, 104
Hormones—
Deficiency thyrotropin in homozygous dwarf beef cattle, 916
Hormone content—
Changes in swine pituitaries during the estrual cycle, 469

Horse—
Environmental sources of variation in gestation length, 789
Genetic sources of variation in gestation length, 797
Hyperthyroidism—
Basal energy and nitrogen metabolism of dairy calves induced by thyroprotein administration, 149

I

Inheritance—
Of scrotal hernia in swine, 516
Insemination—
Relation of interval between inseminations of bovine fertility, 988
Intestines—
Contents in male Holstein calves, 969

L

Laboratory animals—
Effect of selection, 3
Lactation—
Effects of APF concentrate containing aureomycin in swine, 657
Lambs—
Effect of feeding DDT dusted alfalfa hay, 581
Effects of stilbestrol, 602
Ration digestibility, 574
Light transmission—
Measurement for determination of numbers of spermatozoa in bull semen, 219
Lignin ratio technique—
Determining digestibility and forage consumption of plants by sheep, 565

M

Metabolism—
Cobalt studies with sheep, 428
Management—
Factors affecting age at puberty in Poland China and Chester White gilts, 841
Meal—
Comparison of solvent soybean oil meals, 828
Metabolism units—
Design and operation for nutritional studies with swine, 88
Metabolism—
Of nitrogen in hyperthyrodism of dairy calves, 149
Metabolism-crate used with sheep, 592
Methionine—
Effect of feeding to sheep upon utilization of pea and alfalfa protein, 439
Effect on the growth of weanling pigs, 57
Microorganisms—
Action in urea utilization and cellulose digestion influenced by minerals, 693
Microorganisms—
Eosin-nigrosin stain for differentiating live and dead bovine spermatozoa, 981
Isolation of *Spherophorus necrophorus* from the rumen, 733
Urea utilization influenced by variation in source and amount of energy, 683
Urea utilization influenced by nature of proteins, 672
Milk—
Replacements supplemented with enzymes and other products, 975
Sow's seasonal variation in fat, vitamin A, and vitamin D, 533
Milk production—
Efficacy of all alfalfa ration evaluated by net energy vs. TDN, 947
Effects of sprinkling dairy cattle, 961
Minerals—
Drylot supplement for growing and fattening swine, 875
Influence on urea utilization and cellulose digestion by rumen microorganisms using artificial rumen technique, 693
Molasses—
Value of ammoniated condensed distillers as beef cattle feed, 934
Cane, method of feeding to beef cattle, 939
Mutton—
Meat characteristics of the Karakul, 399

N

Niacin—
Supplementary value in a practical mixed plant and animal protein

ration containing B_{12} and aureomycin for weanling pigs in dry lot, 813
Nicotinic acid—
Effect on resistance to artificial infection with *Salmonella choleraesius*, 617
Effect on swine growth, 617
Nutrition—
Compared for several farm animals, 22
Design and operation of metabolism units for study with swine, 88
Relative value of vitamin A and carotene for supplying vitamin A requirements during gestation and beginning lactation, 551

O

Ovarian response—
To progesterone injections in gilts, 665
To progesterone injections in heifers, 752
Ovulation—
Atropine blockage in cows, 719

P

Pantothenic acid—
Deficiency in baby pigs, 80
Penicillin—
Effect upon spermatozoan livability and control of bacteria in bovine semen, 322
Phosphorus—
Radioactive, injected intravenously in swine, 893
Pituitary—
Changes in the hormone content during the estrual cycle in swine, 469
Effect of thyroprotein on the thyrotropic hormone content in swine, 129
Prairie hay—
Digestibility comparisons between steers and lambs fed different quality hays, 236
Effect of stage of maturity and storage on quality, quantity and nutritive value, 447
Progesterone—
Effects of injections on ovaries in heifers, 752
Effects on ovarian functions in gilts, 665
Maintenance of pregnancy in goats, 411
Protein—
Allowance and requirement for growing heifers, 171
Comparative effect of several types in vitamin A metabolism in sheep, 251
Effect of body weight on the biological value for growing swine, 50
Effect of methionine upon the utilization of pea and alfalfa proteins by sheep, 439
Efficiency of corn by-products for swine growth, 607
Influences on urea utilization by rumen microorganisms, 672
Levels and sources in rations for pregnant ewes, 257
Special solvent cottonseed meal as a source for swine, 624
P_{32}—
Distribution in the tissues of a steer fed grass from land that received labeled fertilizer, 335
Puberty—
Age in outbred Chester White and Poland China gilts, 647
Age of, affected by feeding and management factors of gilts, 841
Variation in inbred boars, 494
Variation in inbred gilts, 479
Pyridoxine—
Deficiency in baby pigs, 65

R

Rations—
Animal protein factor and antibiotic supplementation for swine, 629
Digestibility determined by dye, 574
Drylot vitamin and mineral supplements for growing-fattening swine, 875
Evaluation of efficacy of an all-alfalfa hay, for milk production, 947
Effects of whey products and antibiotics on pigs in dry lots, 828
Levels and sources of protein for pregnant ewes, 257

Supplementary value of aureomycin, streptomycin and B_{12} for growing-fattening pigs, 820
Supplementary value of riboflavin, calcium pantothenate and niacin for weanling pigs, 813
Solvent extracted rice bran for growing-fattening pigs, 837
Respiration rate—
Affected by sprinkling dairy cattle, 961
Effect of summer environment, in swine, 523
Riboflavin—
Requirements of growing swine, 807
Supplementary value in a practical mixed plant and animal protein ration containing B_{12} and aureomycin for weanling pigs in dry lot, 813
Rice—
Solvent extracted bran used in rations of growing-fattening swine, 837
Rumen—
Contents and physical characteristics in male Holstein calves, 969
Rumen liquor—
Its *In vitro* digestion of cellulose in the presence of an antiseptic, 203
Ruminants—
A permanent rumen fistula cannula, 417

S

Salmonella choleraesius—
Resistance in swine from use of nicotinic acid, vitamin B_{12} and aureomycin, 617
Scrotal hernia—
Inheritance in swine, 516
Selection—
For economically important characters in swine, 9
For economic characters in swine, 12
For economically important traits of sheep, 17
Summary of effects, 18
Effect in laboratory animals, 3
Semen—
Bacteria control, 322
Determination of numbers of spermatozoa by measurement of light transmission, 219
Spermatozoan motility as a measure of quality, 211
Sesame oil meal—
Value in rations for growing and fattening pigs, 545
Shades—
For cattle, 184
Sheep—
Cobalt metabolism studies, 428
Comparative effect on vitamin A metabolism of urea, soybean oil meal and cottonseed meal, 251
Crossbreeding, 462
Determination of digestibility and forage consumption of desert plants, 565
Differences in digestibility of feeds by cattle and sheep, 337
Effect of alfalfa ash upon roughage digestion, 434
Effect of the corn-alfalfa hay ratio on the digestibility of the different nutrients, 424
Effect of methionine supplementation upon utilization of pea and alfalfa proteins, 439
Genetic and environmental factors affecting staple length in Navajo crossbred weanling lambs, 278
Genetic and environmental factors affecting type and condition in Navajo and Navajo crossbred weanling lambs, 455
Levels and sources of protein in rations of pregnant ewes, 257
Lamb production of Navajo ewes bred to Columbia and Romney rams, and Navajo crossbred ewes bred to Lincoln and Cotswold rams, 272
Lambs compared to steers as to digestibility of different prairie hays, 236
Level of cobalt tolerance in yearlings, 266
Meat characteristics of the Karakul, 399
A permanent rumen fistula cannula, 417
Selection for economically important traits, 17
Use of Metabolism crate, 592

Vitamin B_{12} vs. vitamin B_{12b} in cobalt deficiency, 1017
Vitamin E deficiency in the lamb, 1006
Soybean oil meal—
Comparison, 828
Effect on Vitamin A metabolism in sheep compared to other sources of protein, 251
Specific gravity—
As a measure of the fat content of the pork carcass, 97
Spermatozoa—
Motility as a measure of semen quality, 211
Determination of numbers in bull semen by measurement of light transmission, 219
Technique for characterizing as dead or living by differential staining, 226
Effect of aureomycin, penicillin and streptomycin on livability, 322
Sprinkling—
Effects on respiration rate, body temperature, grazing performance in dairy cattle, 961
Stain—
Eosin-nigrosin for differentiating live and dead bovine spermatozoa, 981
Stilbestrol—
Effect of pellets on growing-fattening pigs, 889
Effect of subcutaneous implantation on growing-fattening swine, 885
Effects on suckling lambs, 602
Streptomycin—
Supplement to special solvent cottonseed meal for swine, 624
Effect upon spermatozoan livability and control of bacteria in bovine semen, 322
Supplementary value in plant protein ration for growing-fattening pigs, 820
Summer environment—
Effect on body temperature and respiration rate in swine, 523
Swine—
Age of puberty and related phenomena in outbred gilts, 647
Animal protein factor and antibiotic supplementation for small grain rations, 629
Carcass studies, 638
Changes of hormone content of pituitaries during the estrual cycle, 469
Supplementary requirements for weanling pigs, 813
Design and operation of metabolism units for nutritional studies, 88
Distribution of intravenously injected radioactive phosphorus in tissues, 893
Effects of APF concentrate containing aureomycin in gestation, lactation, and growth, 657
Effect of body weight on the biological value of protein, 50
Effects of elevated ambient temperature on pregnant sows, 907
Effect of feeding vitamin B_{12}, APF concentrate, and dried whey, 42
Effects of implantation of stilbestrol and testosterone pellets, 889
Effect of methionine and cystine on the growth of weanling pigs, 57
Effect of particle size and phospholipid on growth and fat utilization in baby pigs, 867
Effects of progesterone on ovarian functions in gilts, 665
Effect of selection on economically important characters, 9
Effect of soft and hard coal on growth rate, 543
Effects of solvent soybean oil meals and of dried whey products and antibiotics in dry lot rations, 828
Effect of summer environment on body temperature and respiration rate, 523
Effect of subcutaneous implantation of stilbestrol on growth and fattening, 885
Effect of thyroprotein on anterior pituitary, 129
Feeding and management factors affecting age at puberty in gilts, 841
Growth affected by drylot vitamin and mineral supplements, 875

Growth affected by nicotinic acid, vitamin B_{12} and aureomycin, 617
Protein efficiency from feeding corn by-products, 607
Growth promoting effects of various antibiotics, 538
Heterosis, 104
Heterosis in crosses of inbred lines of Duroc swine, 505
Inheritance of scrotal hernia, 516
Minimal volume of semen and number of sperm needed for fertility in artificial insemination, 138
Pantothenic acid deficiency in baby pigs, 80
Physiological effect of a fat-deficient diet, 112
Supplements to plant protein rations for growing-fattening pigs, 820
Special solvent cotton seed meal as a protein source with or without vitamin B_{12} and streptomycin, 624
Pyridoxine deficiency in baby pigs, 65
Quantitive DL-tryptophan requirement of the weanling pig, 73
Relative value of vitamin A and carotene for supplying vitamin A requirements during gestation and beginning lactation, 551
Riboflavin requirements for growing, 807
Seasonal variation in the fat, vitamin A, and vitamin D content of sow's colostrum and milk, 533
Specific gravity as a measure of the fat content of the carcass, 97
Value of corozo palm nut and sesame oil meals, bananas, APF, and cow manure in rations for growing and fattening pigs, 545
Value of low and high-fat corn for fattening, 902
Value of solvent rice bran in rations, 837
Variation in puberty phenomena in inbred boars, 494
Variation in puberty phenomena in inbred gilts, 479

T

Testosterone—
Effect of pellets on growing-fattening pigs, 889
TDN—
Vs. net energy in evaluation of efficacy of all-alfalfa hay ration for milk production, 947
Thyroprotein—
Effect on thyrotropic hormone content of the anterior pituitary of swine, 129

U

Urea—
Effect on Vitamin A metabolism in sheep compared to other sources of protein, 251
Method of feeding to beef cattle, 939
Utilization by rumen microorganisms as influenced by different amounts and sources of energy, 683
Utilization by rumen microorganisms influenced by minerals, 693
Utilization by rumen microorganisms influenced by protein, 672

V

Vitamins—
Drylot supplement for growing-fattening swine, 875
Vitamin A—
Effect on its metabolism in sheep of urea, soybean oil meal, and cottonseed meal as sources of protein, 251
Seasonal variation in content of sow's colostrum and milk, 533
Compared to carotene for supplying vitamin A requirement of swine, 551
Vitamin B—
Levels in calves digestive tract, 714
Vitamin B_{12}—
Supplement to rations for weanling pigs, 813
Effect on growth of calves weaned early, 331
Effect on resistance to artificial infection with Salmonella choleraesius, 617

Supplement to special solvent cottonseed meal for swine, 624
Effect on swine growth, 617
For cobalt deficient sheep, 1017
Results on growing-fattening pigs, 42
Supplementary value in plant protein ration for growing-fattening pigs, 820
Vitamin D—
Seasonal variation in content of sow's colostrum and milk, 533
Vitamin E—
Deficiency in the lamb, 1006

W

Water consumption—
Effect of cooled drinking water in a hot climate, 742
Of Hereford and Brahman cattle, 742
Wood molasses—
Value as a feed for dairy cattle, 163
Wool—
Genetic and environmental factors affecting staple length in Navajo and Navajo crossbred weanling lambs, 278
